

FITNESS APP – EMPATHY MAP

Understanding the needs, goals, and challenges of busy office professionals before designing a fitness app.

PROBLEM STATEMENT

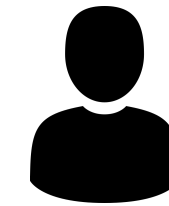

Busy office professionals often struggle to maintain a consistent fitness routine due to demanding work schedules, limited time, low energy levels, and a lack of motivation.

TARGET AUDIENCE & USER PERSONA

Understanding who our users are, what they need, and the challenges they face.

TARGET AUDIENCE

- Age: 25–40 years
- Occupation: Office professionals
- Work Schedule: 9 AM – 6 PM
- Lifestyle: Busy and mostly sedentary
- Goals: Stay healthy, active, and fit

Ahmed Khan

Age: 29

Occupation: Software Engineer

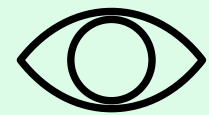

Goal: Stay fit without spending hours at the gym

Frustrations:

- Long work hours
- Low energy after work
- Difficulty staying consistent

EMPATHY MAP

Understanding what busy office professionals see, think, feel, and do in their daily lives.

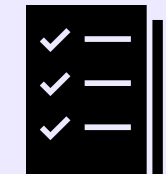

- Fitness content on social media
- Colleagues sitting for long hours
- Busy work schedules
- Health awareness campaigns

- "I don't have enough time to exercise."
- "I need quick and effective workouts."
- "I should take better care of my health."

- Stressed
- Tired after work
- Guilty about being inactive
- Concerned about long-term health

- Sit for long periods
- Skip workouts
- Use fitness apps occasionally
- Try to exercise on weekends

PAIN POINTS & DESIGN OPPORTUNITIES

Identifying user challenges and proposing features that solve their problems.

PAIN POINTS

- Lack of time for exercise
- Low motivation
- Inconsistent workout routines
- Low energy after work
- Difficulty tracking progress

DESIGN OPPORTUNITIES

- Offer quick 10–15 minute workouts
- Send personalized reminders
- Create flexible workout schedules
- Include progress tracking features
- Add rewards and achievement badges
